

Julia WILLIAMS-JACOBSE, Programm Manager "Erfolgsformeln verbinden - nachhaltige Mobilität & Energie in Österreich und den Niederlanden".

Julia Williams-Jacobse is a dedicated sustainability professional with more than 25 years experience as a civil servant (working on sustainability topics for the national ministries of Environment and Economic Affairs) before she decided to strike out on her own in 2016. For the last two decades, she worked as a programme and project manager on diverse climate change topics.

In the last five years of her career with the government, she headed the Dutch national e-mobility programme. This turned her into an enthusiastic private e-driver, who currently drives her second, second-hand, fully electric car which she shares with husband and daughter.

Currently, among other activities, she coordinates the Partners for International Business Programme (PIB) "Erfolgsformeln verbinden nachhaltige Mobilität und Energie in Österreich und in den Niederlanden" (2017-2019). Contributing to the development of a zero-emission transport corridor between the Netherlands and Austria is one of the main goals of this PIB.

Julia holds a degree from the University of Wageningen
